Tour Guides

The walking tour will provide a “behind the scenes” look at the first phase of the long anticipated Spruce Peak at Stowe development. To learn more about the project visit www.sprucepeak.com.

Claire Humber

Claire has been a part of the SE team for over seventeen years, and has worked at mountain resorts throughout Canada and the United States, Scandinavia, Korea and Japan. Claire is a ‘big picture’ strategic thinker, and balances her creative approach to planning and design with the practicality of project management, implementation and eventual operations. This balance allows clients to realize their vision and project goals, while working within the reality of physical, social, economic, environmental and practical considerations. Claire has been working with the folks at Stowe since they first started contemplating the Spruce Peak development in 1995.

Michael Willard

Michael is an integral member of the SE Group construction documentation and management team. Michael’s technical skills and in-depth knowledge of materials and construction techniques allows him to guide clients work through difficult design challenges during project implementation. Mike’s creative yet practical design approach allows SE Group’s clients to create memorable and functional environments, while balancing the challenges of operating a resort on a day to day and seasonal basis. Mike has been the PM for the Spruce Peak at Stowe since the development’s inception in 2003.
