Sign up for a Vectorworks Classroom Training now to ensure a high return on your Vectorworks investment. This seminar is ideal for new users of the software, but is also valuable for existing users. Vectorworks Landmark training is a two-day seminar designed to get you up and running on Vectorworks quickly and smoothly. First, you'll get an introduction to Vectorworks basics, including creating and editing 2D objects, using snap constraints and dimensions, applying text and graphic attributes and file organization. Then you'll delve into more detail with a thorough overview of Vectorworks Landmark, including:

- Plant tools: Creating new plants, using the plant database, plant tags, creating hybrid (2D/3D) plant symbols and more.
- Landscape tools: Using the landscape area and hardscape tool.
- Digital Terrain Model.
- Plant List: Using build in worksheets and schedules, 2-way worksheets.
- Developing a presentation using Viewports and Sheets Layers.
- Working together: Workgroup referencing, import DXF/DWG.

Earn CE Credits

You'll also receive AIA, ASLA or APLD credits.

Special Price: \$699 (Regular Price: \$750)
